

**Maria Teresa's Babies Early Enrichment Center  
Arlington, VA  
Landscape/Putting Green**

We are extremely satisfied with the results of the installation of the artificial lawn by Chesapeake Bay Synthetic Landscapes at our Arlington Daycare Center, Maria Teresa's Babies Early Enrichment Center. The SYNLawN product they installed looks beautiful and it is exceptionally useful for the children in our Center. The Children are enjoying the yard every day playing with all our equipment including playing mini-golf, soccer, baseball, basketball, and many other outside activities that support our healthy-mind healthy-body philosophy. Furthermore, these outdoor activities help the children develop gross and fine motor skills as well as well as language, social, emotional, physical, and cognitive development with even more ample opportunities to be outside because of the newly installed lawn.

The installation by Chesapeake Bay Synthetic Landscapes took less time than expected and there was minimal, if any, disruption of the daycare center activities. For anyone that is thinking about having this done, we wholeheartedly recommend them for their professionalism and we could not be any happier for choosing them for this project. Most importantly, the children are enjoy the outside time and we don't have to worry about dirt or even small falls because of the cushion that the SYNLawN product has and regular lawns don't. We are happy for making this investment that will last for years and just to see the children's faces enjoying their outside activities makes it all worthwhile. Chesapeake Bay Synthetic Landscapes put us at ease and now the children in our care can benefit from this product and the exceptional work that they did in installing it. Thank you Chesapeake Bay Synthetic Landscapes!
